

Maximizer Fuel Tank

The Maximizer Fuel Tank is for GAS token holders to maximize their amounts of GAS without ever needing to buy anymore.

Inside of the Maximizer There are 3 main components. The Stakes, The Rewards, and The Contract.

The Stakes and The Rewards are earning rewards from the token to The Contract every reward cycle. Once the Contract has met a threshold of rewards, it will use them to buy more GAS at a 0% tax rate and place these tokens into the reward system.

This contract can by-pass the tax that ensues when

a user makes a transaction with GAS tokens. Truly allowing for the MAXIMUM amount of GAS for your Tank.
