

Mining Pass

A Mining Pass is a ERC721 (NFT) Token that when held in the owners wallet, passively rewards GAS tokens to the owner, and in-exchange can be used for entry on Premium Fuel Tanks, or void fees on regular Fuel Tanks.

Tokenomics:

There are an unlimited amount of Mining Passes that can be minted, with a hard-cap of 5,000. This means that after 5,000 are in circulation at any given point in time, users can no longer purchase Mining Passes until they have been used by their owners.

Mining Passes have three core utilities:

- Passive Rewards in GAS Tokens every 24 hours
- Burned as Entry for Premium Fuel Tanks
- Burned as alternative to TAX on Fuel Tanks

Distributions of GAS tokens are based on the current circulation of Mining Passes at a constant rate:

$$(Supply\ of\ GAS / 730\ Days) / Mining\ Passes\ in\ Circulation$$

Premium Fuel Tanks

Premium Fuel Tanks are short lived, high ROI Fuel Tanks where entry requires Mining Passes. These are funded in a series of ways, including but not limited to Partnership Tokens, & Rewards in highly valuable assets such as WBTC.
